

# FALKE Ergonomic Sport System Socks and Underwear AW18

Date: **2018-06-11 10:55**

Published by: **FALKE Ergonomic Sport System**

The tried-and-tested FALKE fit, combined with an elaborate material combination for perfect moisture management, is what distinguishes the FALKE sports socks. The new socks with fashionable highlights provide outstanding comfort and are real eye-catchers. Skiers wear the FALKE SK4 Trend with stripes in dégradé design for a modern look on the slopes. Trekking fans and runners will find what their heart desires with the FALKE TK5 Trend and the FALKE RU4 Trend, also in the trendy striped look. For runners, FALKE additionally offers the RU4 Trend for women with dot details and for men with Herringbone pattern. Trekking enthusiasts can also show their love for the mountains on their socks with the FALKE TK Mountain: A mountain pattern in woolly plush adorns the shaft of the socks.

## **New: FALKE RU4 Sensitive**

The classic FALKE RU4 is offered in Autumn/Winter 2018/2019 with an extra soft, comfortable cuff. Silicone dots on the inside prevent the cuff from slipping for a particularly comfortable fit during running.

## **New: FALKE SK6**

The new FALKE SK6 for ambitious skiers is ultra-lightweight and has the perfect FALKE fit. The shin, calf and ankle area are protected from injury by padding, and the material combination of merino wool and polypropylene ensures optimum moisture management.

## **FALKE Mid-Layer:**

The three lines FALKE Warm, FALKE Maximum Warm and FALKE Wool-Tech also feature a seasonal look. Stripes and different collar shapes make the simple shirts and tights real eye-catchers not only as first layer, but also as a mid-layer under the ski jacket and for the après-ski party.
