FALKE Trekking

In order to really enjoy the trekking experience, not only the perfect footwear, but also the right socks and clothing are of great importance. All FALKE trekking socks are characterised by their perfect fit, thanks to right and left padding and toe box. The material compositions, which are tailored to the different requirements, ensure a comfortable temperature and very good moisture management. And the clothing of the FALKE Ergonomic Sport System is also the perfect companion for hiking thanks to its functional cuts and materials.

FALKE Trekking products are not only convincing in terms of function, but also in terms of appearance. The bestseller, FALKE TK2, is offered in a two-colour trend version - **FALKE TK2 Trend Gradient** - in which the colour of the shaft gradually changes to the colour of the foot area. The lightweight **FALKE TK5 Short Trend Offset** is a real eye-catcher, especially for urban trekking, thanks to its sporty graphic design with differently colored, openworked stripes. Both articles are available in four different colour combinations for men and women. The **FALKE TK2 Trend Crest** - trend bestseller - with mountain silhouette motif is also available in new trend colours for the spring/summer season 2021.

FALKE is expanding its product range and, in addition to the well-known FALKE Wool Tech Underwear, now also offers T-shirts and thermal layers made of a proven wool/polyamide blend. The **FALKE Natural T-Shirt** and the **FALKE Thermal Half Zip** are particularly skin-friendly, easy-care and durable and guarantee quick drying. Also brand new is the **FALKE Wool Tech Light Bra Top** - perfect body climate and body feeling thanks to the natural wool fibre. The soft, adjustable straps made of stretch velour ensure a perfect fit. The inside of the new **FALKE Warm Up Jacket** has a soft 3D structure made of finest wool yarn and the

outside is more resistant to abrasion and pilling thanks to the use of polyamide. The **FALKE Competitor Pants** made of highly functional polyamide bi-stretch fabric, for men and women, are wind- and water-repellent without losing breathability.
