FALKE Trekking

For the first time, FALKE is presenting its own Trekking Capsule in the Autumn/Winter 2021/22 collection, offering a complete package for the perfect hiking experience for men and women, from socks to functional underwear and outerwear including matching accessories.

The already familiar mountain silhouette motif of the FALKE TK2 Crest is transferred to both T-shirts and knitted jumpers, creating a uniform image. Colour-coordinated thermal layers, half-zip knitted jumpers and various jackets extend the range of outerwear that combines functionality and aesthetics. The **FALKE Trekking Vest** convinces with a unique combination of a wool padding towards the body and a downlike padding ("fake down") towards the outside. This ensures optimum regulation of the body temperature even during higher activity levels, stores heat and protects the body from cold from the outside.

Bi-elastic material made of recycled nylon and polyester provides the basis for the **FALKE Trekking Pants**. Polyamide on the outside provides the best abrasion resistance, while polyester on the inside ensures rapid moisture transport from the skin to the outside. **FALKE Trekking Tights** for women offer a fashionable and figure-hugging alternative to classic trekking trousers. The knee and seat areas are made of particularly abrasion-resistant and elastic material, lined with functional mesh and extra soft and quick-drying mesh lining on the waistband for optimum wearing comfort.

The FALKE TK2, our bestseller in trekking socks, is perfect for long hikes

in easy terrain. The two trend versions of the sock, the **FALKE TK2 Crest** with the mountain silhouette motif already mentioned and the **FALKE TK2 Color** in a two-tone, clear colour block design, complete the Trekking Capsule.
